MAHARASHTRA STATE BOARD OF TECHNICAL EDUCATION, MUMBAI
TEACHING AND EXAMINATION SCHEME FOR POST S.S.C. DIPLOMA COURSES

COURSE NAME : COMPUTER ENGINEERING GROUP

COURSE CODE : CO/CD/CM/CW/IF

DURATION OF COURSE : 6 SEMESTERS For CO/CM/CW/IF (8 SEMESTERS for CD) **WITH EFFECT FROM 2012-13**

SEMESTER : SECOND **DURATION : 16 WEEKS**

FULL TIME / PART TIME : FULL TIME **SCHEME : G**

SR. NO.	SUBJECT TITLE		Abbrev iation	SUB CODE	TEACHING SCHEME			PAPER HRS.	TH (1)		PR (4)			OR (8)		TW (9)		SW (17200)

Student Contact Hours Per Week: **34 Hrs.**

THEORY AND PRACTICAL PERIODS OF 60 MINUTES EACH.

Total Marks **: 800**

@- Internal Assessment, # - External Assessment, ▭ No Theory Examination, $ - Common to all branches

Abbreviations: TH-Theory, TU- Tutorial, PR-Practical, ,OR-Oral, TW- Term Work, SW- Sessional Work

➢ Conduct two class tests each of 25 marks for each theory subject. Sum of the total test marks of all subjects is to be converted out of 50 marks as sessional work (SW).

➢ Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.

➢ Code number for TH, PR, OR and TW are to be given as suffix 1, 4, 8, 9 respectively to the subject code.

* Applied Science is divided into two parts- Applied Science (Physics) and Applied Science (Chemistry).Theory examination of both parts as well as practical examination of both parts will be conducted on separate days. Sum of theory marks of both parts shall be considered for passing theory examination of Applied Science. Similarly it is also applicable to practical examination. It is mandatory to appear theory and practical examination of both parts. Remaining absent in any examination of any part will not be declared successful for that examination head.

Course Name : All Branches of Diploma in Engineering & Technology

Course Code : AE/CE/CH/CM/CO/CR/CS/CW/DE/EE/EP/IF/EJ/EN/ET/EV/EX/IC/IE/IS/
                ME/MU/PG/PT/PS/CD/CV/ED/EI/FE/IU/MH/MI/DC/TC/TX

Semester   : Second

Subject Title : Communication Skills

Subject Code : 17201

Teaching and Examination Scheme:

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
02	--	02	03	100	--	25#	25@	150

NOTE:

- ➢ **Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.**
- ➢ **Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work. (SW)**

Rationale:

In this age of globalization, competition is tough. Hence effective communication skills are important. Communication skills play a vital and decisive role in career development. The subject of Communication Skills introduces basic concepts of communication. It also describes the verbal, non-verbal modes and techniques of oral & written communication.
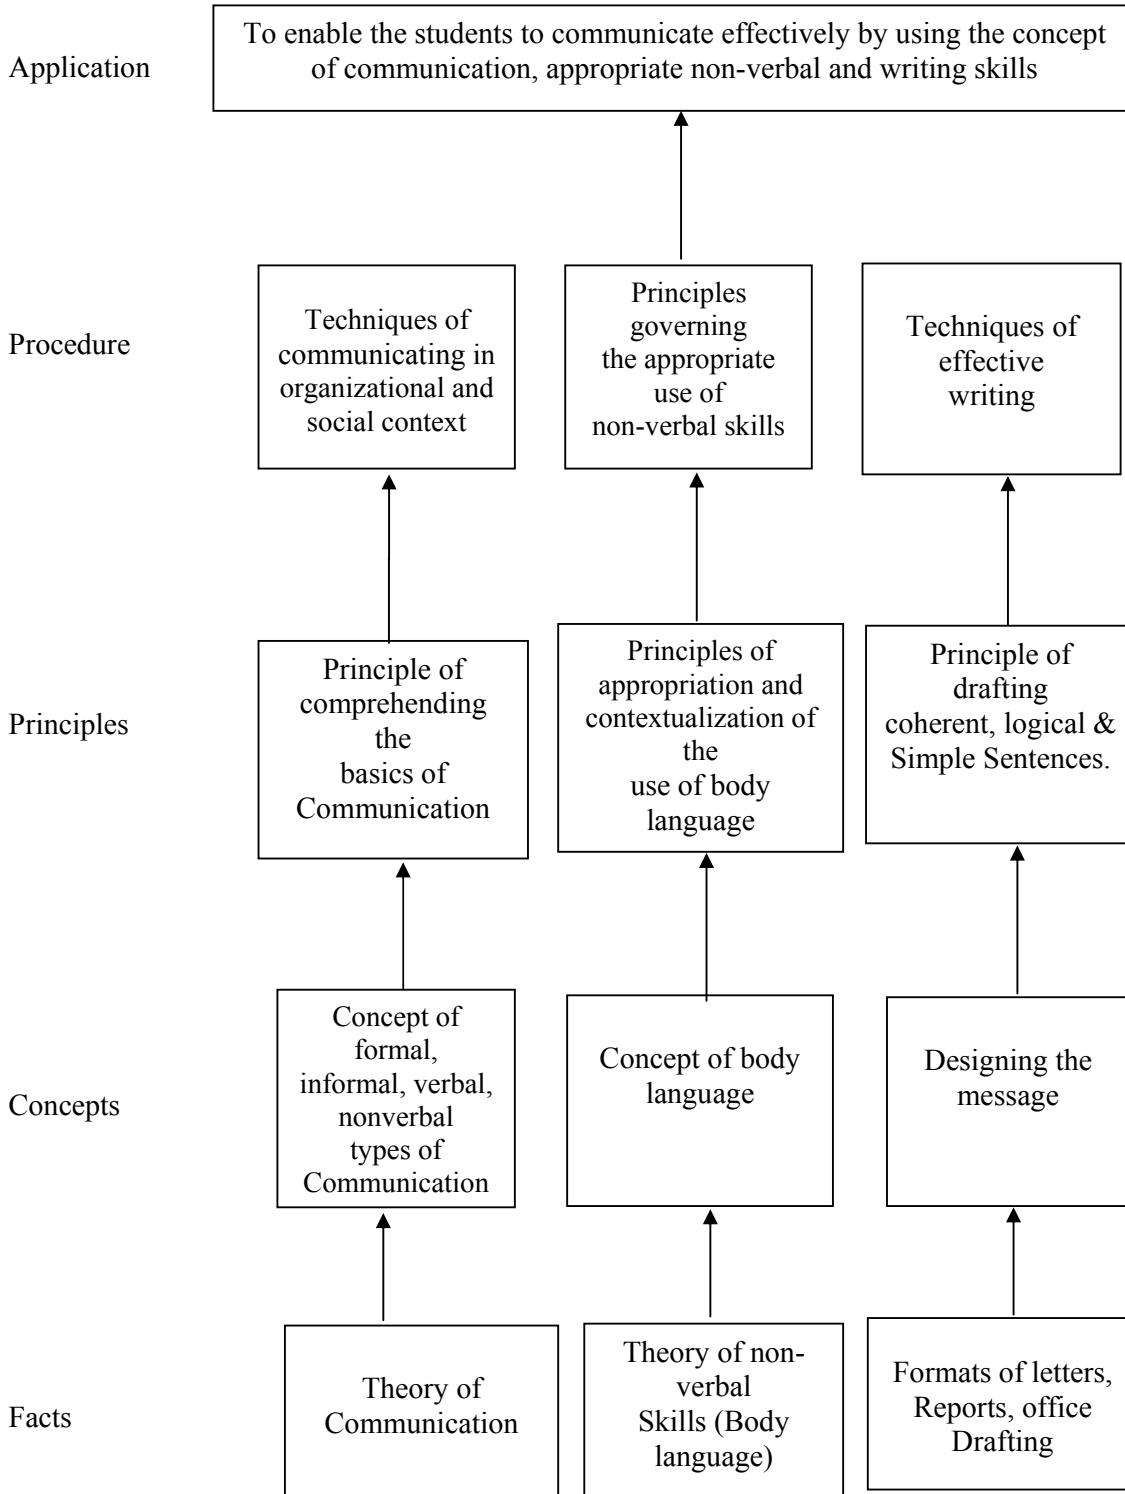

It will guide and direct to develop a good personality and improve communication skills.

General Objectives:

Students will be able to:

1. Utilize the skills necessary to be a competent communicator.
2. Select and apply the appropriate methods of communication in various situations.

Learning Structure:

Application	To enable the students to communicate effectively by using the concept of communication, appropriate non-verbal and writing skills

Procedure	Techniques of communicating in organizational and social context	Principles governing the appropriate use of non-verbal skills	Techniques of effective writing
Principles	Principle of comprehending the basics of Communication	Principles of appropriation and contextualization of the use of body language	Principle of drafting coherent, logical & Simple Sentences.
Concepts	Concept of formal, informal, verbal, nonverbal types of Communication	Concept of body language	Designing the message
Facts	Theory of Communication	Theory of non-verbal Skills (Body language)	Formats of letters, Reports, office Drafting

Theory

Name of the Topic	Hours	Marks

Topic 01 - Introduction to Communication:
 	
Specific Objective:
 	
  ➤ Describe the process of communication.
 	
Contents:
    • Definition of communication
    • Process of communication
    • Types of communication -- Formal, Informal, Verbal, Nonverbal, Vertical, Horizontal, Diagonal
	06	**16**

Topic 02 - Effective communication
 	
Specific Objective:
  ➤ Identify the principles and barriers in the communication process
 	
Contents:
 	
    ✦ Principles of communication.
    ✦ Barriers to communication
  a. **Physical Barrier**:
    ✦ Environmental (time, noise, distance & surroundings),
    ✦ Personal (deafness, stammering, ill-health, spastic, bad handwriting)
  b. **Mechanical** : Machine oriented
  c. **Psychological:** Day dreaming, prejudice, emotions, blocked mind, generation gap, phobia, status inattentiveness, perception.
  d. **Language** : Difference in language, technical jargons, pronunciation & allusions.
	08	**20**

Topic 03 - Non verbal & Graphical communication:
Specific Objectives:
  ➤ Effective use of body language & nonverbal codes
  ➤ View and interpret graphical information precisely.
 	
Contents:
3.1 Non- verbal codes: [08 Marks]
    • Proxemics,
    • Chronemics
    • Artefacts
3.2 Aspects of body language (Kinesics)   [10 Marks]
    • Facial expression
    • Eye contact
    • Vocalics, paralanguage
    • Gesture
    • Posture
    • Dress & appearance
	08	**28**

• Haptics		
3.3 Graphical communication [10 Marks] • Advantages & disadvantages of graphical communication • Tabulation of data & its depiction in the form of bar graphs & pie charts.		

Topic 04 - Listening
 Specific Objective:
 	
 ➢ Effective use of listening
 	
 Contents:
    • Introduction to listening
    • Listening versus hearing
    • Merits of good listening
    • Types of listening.
    • Techniques of effective listening.
	02	**08**

Topic 05 - Formal Written Communication **Specific Objectives:** ➢ Use different formats of formal written skills. **Contents:** • Office Drafting: Notice , memo & e-mail • Job application with resume. • Business correspondence: Enquiry letter, order letter ,complaint letter, adjustment letter. • Report writing: Accident report, fall in production, investigation report. • Describing objects & giving instructions	**08**	**28**
	32	**100**

Skills to be developed in practical:

Intellectual Skills:

    1. Analyzing given situation.

    2. Expressing thoughts in proper language.

Motor Skills:

    1. Presentation Skills focusing on body language.

    2. Interpersonal skills of communication

Journal will consist of following assignments:

01: Draw the diagram of communication cycle for given situation.

    State the type and elements of communication involved in it.

02: Graphics:-   a) Draw suitable bar-graph using the given data.
                     b) Draw suitable pie-chart using the given data.

03: Role play: Teacher should form the group of students based on no. of characters in the situation. Students should develop the conversation and act out their roles.

04: Collect five pictures depicting aspects of body language from different sources such as magazines, newspapers, internet etc. State the type and meaning of the pictures.

NOTE: The following assignments should be performed by using Language Software.

05 Practice conversations with the help of software.

06 Describe people/personalities with the help of software and present in front of your batch.

07 Prepare and present elocution (three minutes) on any one topic with the help of software.

08 Describe any two objects with the help of software.

Course Name : Computer, Electrical and Electronics Engineering Group

Course Code : EE/EP/EJ/EN/ET/EX/EV/IC/IE/IS/MU/DE/ED/EI/IU/CO/CM/IF/CD/CW

Semester   : Second

Subject Title : Applied Science (Physics)

Subject Code : 17210

Teaching and Examination Scheme:

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
02	--	02	02	50	25@	--	--	75

NOTE:
- ➢ **Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.**
- ➢ **Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work. (SW)**
- ➢ **Applied Science is divided into two parts- Applied Science (Physics) and Applied Science (Chemistry). Theory examination of both parts as well as practical examination of both parts will be conducted on separate days. Sum of theory marks of both parts shall be considered for passing theory examination of Applied Science. Similarly it is also applicable to practical examination. It is mandatory to appear theory and practical examination of both parts. Remaining absent in any examination of any part will not be declared successful for that examination head.**

Rationale:

Applied Physics is the foundation of all core technology subjects. Study of science and technology goes hand in hand. Technical knowledge can be gained more effectively using concepts of Physics. Curriculum of Applied physics includes applications used in the Electronics, Electrical and Computers industry.

Study of various topics like electrical Instruments and condenser enables the students to use various electrical instruments and study their applications. Semiconductor physics makes the students aware of semiconductor devices such as P-N Junction diode, Semiconductor devices are based on transport of charge.
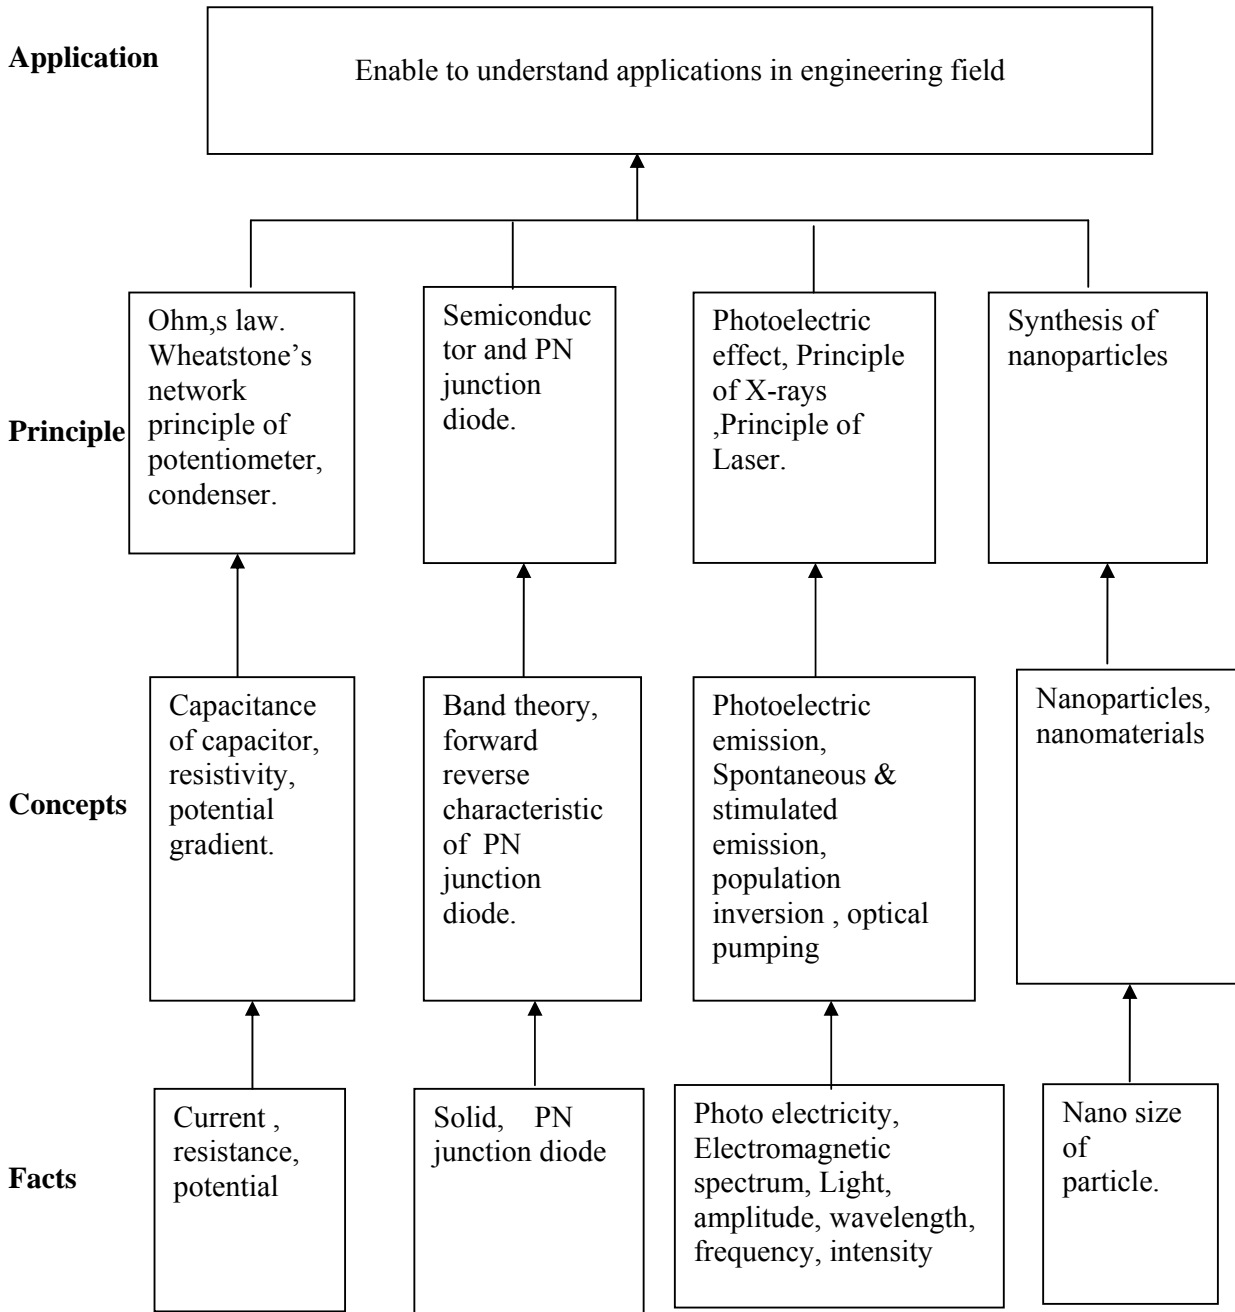

Modern concepts like LASER and nanotechnology make the students to understand various properties and applications. The concept of LASER is beneficial for the students to understand the use of LASER in Fiber optic communication. Commercially lasers are used in sensing devices such as bar code recognition, distance meter (LIDAR), Transmission of optical signal through optical fibres & avoid cross talk .Application of laser namely HOLOGRAPHY is used to store data in ROM Chips. Holograms store large amount of data in 3D form.

Nanotechnology will invoke the students to understand the nanoparticles and carbon nanotubes. Power can be transmitted at low voltage levels. Nanosized components show unique properties which are different from larger semiconductor components. These devices have increased data storage capacities of hard disks and led to small & faster microprocessors.

General Objectives: Students will be able to

1. Understand laws and principles of electrical circuits.
2. Classify solids on the basis of semiconductor band theory.
3. Understand principle of Laser and its applications in engineering field.
4. Identify superconductor and its types.
5. Understands applications of nanoparticles in engineering field.

Learning Structure:

Application	Enable to understand applications in engineering field			
Principle	Ohm,s law. Wheatstone's network principle of potentiometer, condenser.	Semiconductor and PN junction diode.	Photoelectric effect, Principle of X-rays ,Principle of Laser.	Synthesis of nanoparticles
Concepts	Capacitance of capacitor, resistivity, potential gradient.	Band theory, forward reverse characteristic of PN junction diode.	Photoelectric emission, Spontaneous & stimulated emission, population inversion , optical pumping	Nanoparticles, nanomaterials
Facts	Current , resistance, potential	Solid, PN junction diode	Photo electricity, Electromagnetic spectrum, Light, amplitude, wavelength, frequency, intensity	Nano size of particle.

Applied Physics (Computer/ Electrical / Electronics Engineering group) Theory:

Topics and contents	Hours	Marks

Topic1] Basic Electric circuits:
Specific objectives
   ➤ Calculate basic electric parameters for designing the simple electric circuits.
   ➤ Use basic electronic components like resistor, capacitor in electronic circuits.
   ➤ Use various networks such as Whetastone's network , potentiometer
   ➤ Study principle and applications of condenser
1.1 Simple D.C. electric circuits: **[04 Marks]**
  • Electric current: definition, symbol and unit, Ohm's law: statement, mathematical expression, resistivity: definition, unit, conductivity: definition, unit.
1.2 Wheatstone's network and potentiometer   **[06 Marks]**
  • Wheatstone's network, working principle, balancing condition, principle of potentiometer, potential gradient
1.3 Condensers: **[06 Marks]**
  • Capacity of condenser-definition and its unit, definition of 1 farad capacity, principle of condenser, derivation of capacity of parallel plate condenser, statement and derivation of series and parallel combination of condensers.
	12	**16**

Topic 2] Semiconductor Physics:
Specific objectives
   ➤ Differentiate between conductor, semiconductor, insulator
   ➤ Verify characteristics of P-N junction diode
   ➤ Study applications of P-N junction diode, photodiode.
 	
  • Classification of solids on the basis of band theory: forbidden energy gap, conductor, insulator, semiconductor.
  • Classification of semiconductors, P-N junction diode, forward characteristics of P-N junction diode, reverse characteristics of P-N junction diode, photodiode, its symbol, principle and applications.
	04	**10**

Topic 3]: Modern physics.
Specific objectives:
   ➤ State the concept of photocell
   ➤ State applications of X - ray
   ➤ State properties and applications of LASER
3.1 Photo electricity: **[06 Marks]**
  • Photon (quantum), Plank's hypothesis, energy of photon**,** properties of photons.
  • Photo electric effect: circuit diagram, process of photoelectric emission, definitions:-threshold frequency, threshold wavelength, stopping potential, characteristics of photoelectric effect
  • Work function, Einstein's photoelectric equation, photo resistor (LDR) - symbol, principle, applications, photoelectric cell:- principle, applications.
3.2 X-rays: **[06 Marks]**
  • Origin of X-rays, production of X-rays using Coolidge's X-ray tube,
	12	**18**

minimum wavelength of X-ray, properties of X-rays, applications of X- rays: engineering, medical and scientific. **3.3 Laser:** **[06 Marks]** • Laser, properties of laser, spontaneous and stimulated emission, population inversion, optical pumping. • He-Ne Laser: Principle, construction and working, engineering applications of Laser		
Topic 4] Physics of Nanoparticles: **Specific Objectives** ➢ Study properties of nanoparticals. ➢ Study applications of nanotechnology. • History, nanoparticles, properties of nanoparticles, methods of synthesis of nanoparticles: physical method of synthesis of nanoparticles, engineering applications of nanotechnology.	**04**	**06**
Total	**32**	**50**

Practical:

Skills to be developed

    1) **Intellectual skills-**

        ▪ Proper selection of measuring instruments

        ▪ Verify the principles, laws, using given instruments under different conditions.

        ▪ Read and interpret the graph.

        ▪ Interpret the results from observations and calculations.

    2) **Motor skills-**

        ▪ Handle/operate the instruments.

        ▪ Measuring physical quantities accurately.

        ▪ Observe the phenomenon and to list the observations in a tabular form.

        ▪ Plot the graphs.

List of experiments:

Sr No	Title of Experiment	To be performed by a group of
1	Determine specific resistance by voltmeter ammeter method	4 to5 **students**
2	Verify law of resistances in series by using meter bridge.	4 to5 **students**
3	Verify principle of potentiometer	4 to5 **students**
4	Determine the characteristics of condenser using RC circuit.	4 to5 **students**
5	Verify characteristics of photoelectric cell.	4 to5 **students**
6	Verify characteristics of thermocouple.	4 to5 **students**
7	Plot forward characteristics of P-N junction diode	4 to5 **students**
8	Determine Joule's constant (J) by electrical method.	4 to5 **students**
9	Determine temperature co-efficient of resistance of metal (conductor) using platinum resistance thermometer	4 to5 **students**

It is mandatory to appear theory and practical examination of both parts. Remaining absent in any examination of any part will not be declared successful for that examination head.**

Rationale:

     The contents of this curriculum has four units which provide knowledge of cells and batteries, selection of appropriate materials for engineering applications and methods of protection by metallic and non-metallic coatings. This satisfies the need of the students to cope with the recent use of these materials and processes in their world of work.

     Unit of cells and batteries covers working principle of construction, operations and their engineering applications. Now a days there are new electronic devices, gadgets coming up in the market which function on cells and batteries. Study of cells and batteries give complete knowledge of working of reversible and non-reversible cells, their classification, construction, chemical reactions during working and different chemicals used in manufacturing of cells and batteries will help the students to make proper selection in electronic equipments and computer industry.

     Study of different polymers, insulators or dielectrics, adhesives and their chemical behavior will be useful in their applications in electrical appliances and electronic industries. Study of corrosion and methods of prevention will make students realize importance of care and maintenance of machines and equipments.

     The contents of this subjects are designed to enhance student's reasoning capacity and capabilities in solving challenging problems at various levels of working in the electronic and computer industry.
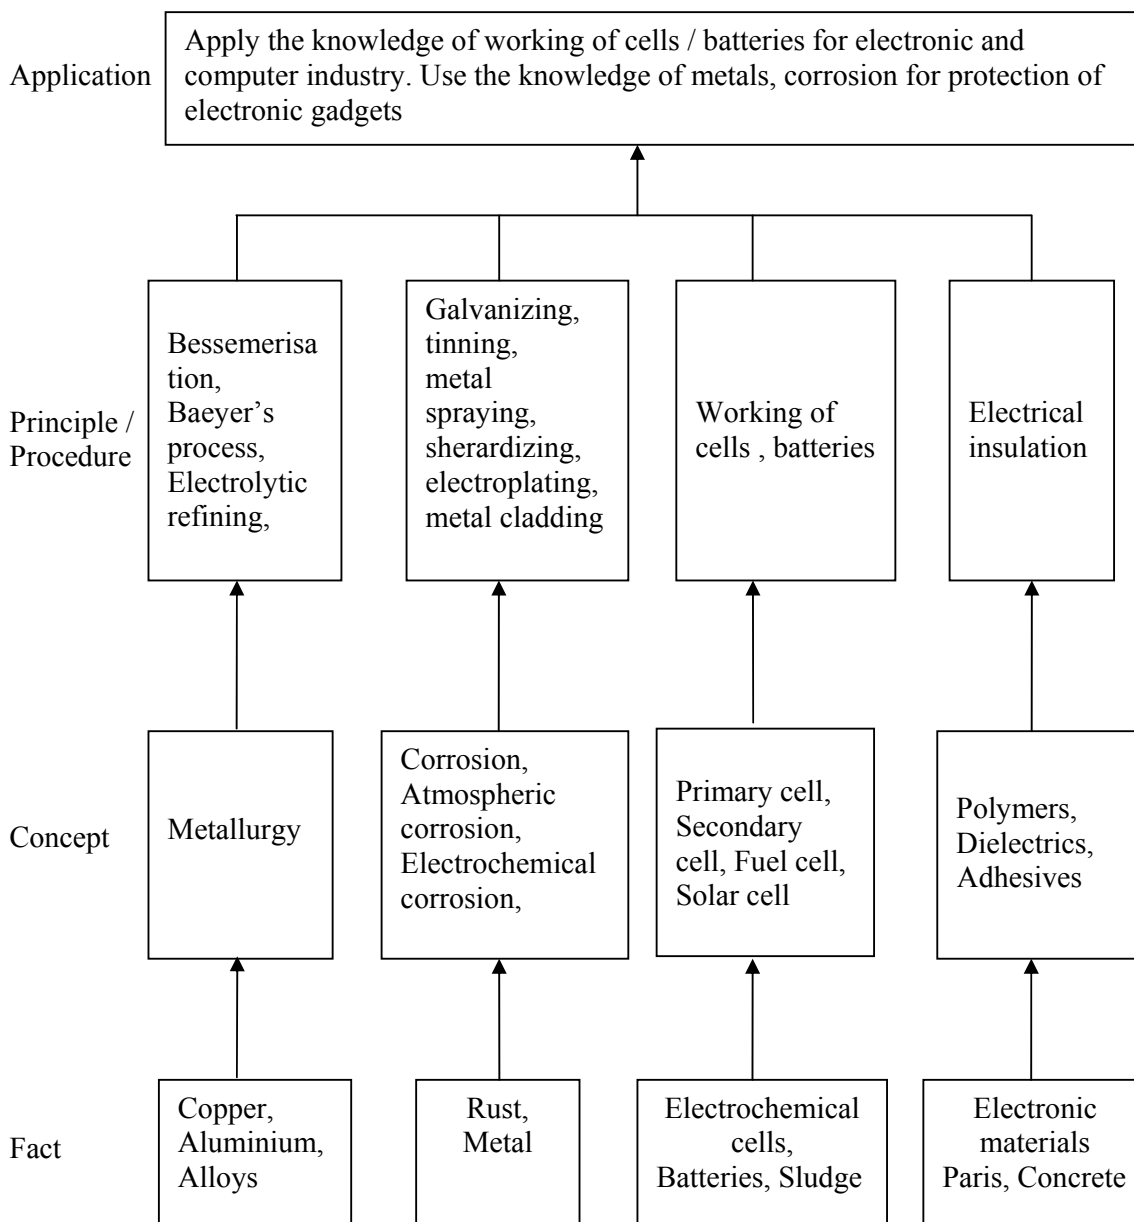

General Objectives:
The student will be able to
   1. Select proper type of cell based on the requirement in electronic and computer engineering.

2. Apply knowledge of extraction, properties of copper and aluminium in engineering applications.
3. Know various insulating or dielectric materials used for electronic equipments and computers.
4. Generalize different factors which affect atmospheric as well as electrochemical Corrosion.

Learning structure:

Application	Apply the knowledge of working of cells / batteries for electronic and computer industry. Use the knowledge of metals, corrosion for protection of electronic gadgets	

Principle / Procedure	Bessemerisation, Baeyer's process, Electrolytic refining,	Galvanizing, tinning, metal spraying, sherardizing, electroplating, metal cladding	Working of cells , batteries	Electrical insulation

Concept	Metallurgy	Corrosion, Atmospheric corrosion, Electrochemical corrosion,	Primary cell, Secondary cell, Fuel cell, Solar cell	Polymers, Dielectrics, Adhesives

Fact	Copper, Aluminium, Alloys	Rust, Metal	Electrochemical cells, Batteries, Sludge	Electronic materials Paris, Concrete

Theory content:

Topics and Contents	Hours	Marks
Topic 1] Metallurgy: **Specific Objectives:** ➢ Describe the extraction processes of copper and aluminium. ➢ State engineering applications of copper and aluminium based on their properties. **1.1 Metallurgy of Copper:** **[4 Marks]** • Definition of metallurgy. • Extraction process: Ores of copper, extraction of copper from copper pyrite by concentration, roasting, smelting, bessemerisation, electrolytic refining. • Physical, chemical properties – action of air, water, acid, alkali. Applications of copper. **1.2 Metallurgy of Aluminium:** **[4 Marks]** • Extraction process: Ores of aluminium, extraction of aluminium from bauxite by Bayer's process, electrolytic reduction of alumina, electrolytic refining of aluminium. • Physical, chemical properties–action of air, water, acid, alkali. Applications of aluminium, anodizing of aluminium. **1.3 Solders:** **[4 Marks]** • Composition, properties and applications of- soft solder, tinmann's solder, brazing alloy, rose metal, plumber's solder.	**08**	**12**
Topic 2] Corrosion: **Specific Objectives:** ➢ Explain Mechanism of atmospheric corrosion and immersed corrosion. ➢ Describe different methods of protection of metal from corrosion **2.1 Corrosion:** **[6 Marks]** • Definition of corrosion, Types of corrosion. • Atmospheric Corrosion: Definition, mechanism of oxidation corrosion, types of oxide films and their significance, factors affecting rate of atmospheric corrosion. • Immersed Corrosion: Definition, mechanism of immersed corrosion by galvanic cell action- with evolution of hydrogen gas and absorption of oxygen gas, factors affecting immersed corrosion. **2.2 Protection of metals by:** **[8 Marks]** • Modification of environment, modification of properties of metal, electrochemical protection by sacrificial anodic protection and impressed current cathodic protection, use of protective coatings. • Application of metallic coatings: By galvanising, tinning, metal spraying, electroplating, metal cladding, cementation- sherardizing, chromising, colourising. • Application of non-metallic coatings: paint-definition, characteristics, constituents of paint and their functions.	**10**	**14**

Topic 3] Cells And Batteries: **Specific Objectives:** ➢ Explain the concept of electrochemical cell. ➢ Describe construction and working of different types of cells. **Electrochemical cells/ batteries:** • Basic concepts : Definition of electrolyte, conductivity of electrolytes, Ohm's law, specific conductance, equivalent conductance, cell, battery, electrolytic cell, electrochemical cell, charging, discharging. • Classification of electrochemical cells: Primary and secondary cells. • Primary cells: construction, working and applications of - Dry Cell, Daniel cell, • Secondary cells: construction, working and applications of - Lead-acid storage cell, Ni-Cd Cell • Fuel cell : Definition, construction, working, advantages, limitations and applications of Hydrogen- oxygen fuel cell.	**10**	**16**
Topic 4] Chemistry of Electronic Materials **Specific Objectives:** ➢ State role of polymers in electronic engineering. ➢ Describe applications of dielectrics and insulators in electronic devices. **4.1 Polymers:** **[4 Marks]** • Definitions, examples and applications of electrically conducting polymers, photoconductive polymers, electrically insulating polymers, liquid crystal polymers(LCP). **4.2 Insulators, Dielectrics and Adhesives:** **[4 Marks]** • Definition of dielectrics and insulator, Properties of gaseous, liquid and solid insulators , their examples. Properties and applications of- inert gases, silicone fluids, teflon , bakelite, ceramics and glass. • Definition, characteristics, advantages of adhesives, properties and applications of phenol formaldehyde resin, urea formaldehyde resin and epoxy resin.	**04**	**08**
Total	**32**	**50**

Practical:

Intellectual Skills:

1. Select proper equipments and instruments.

2. Interpret the results.

3. Plan the set up of the experiment.

4. Verify the characteristics of materials.

Motor Skills:

1. Measure the parameters accurately.

2. Calibrate the equipments as per the standards.

3. Calculate the results.

4. Measure chemicals accurately.

5. Handle apparatus and various laboratory reagents.

6. Observe the completion of reaction.

List of Experiments:

Sr. No.	Name of the experiment
1	Determine percentage of copper in the given brass alloy or copper ore.
2	Determine percentage of aluminium in aluminium alloy.
3	Determine electrode potential of various metals to study their tendency towards corrosion.
4	Find the relation between loss in weight of aluminium strip in acidic and alkaline medium and rate of corrosion.
5	Determine the strength of given hydrochloric acid solution by titrating it against sodium hydroxide solution by using pH meter.
6	Determine thinner content in oil paint.
7	Determine neutralization point of acetic acid (weak acid) and ammonium hydroxide (weak base) and to calculate normality and strength of acetic acid.
8	Measure the voltage developed due to chemical reactions by setting up a Daniel cell.
9	To prepare urea formaldehyde resin and understand the structure and properties for its applications in engineering.

Learning Resources:
1. Reference Books:

> ➢ **Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work. (SW)**

Rationale:

In today's information technology era, computer technology plays an important role. Computer applications are all pervasive in day to day life of human being. It become compulsory to all employable to have sound knowledge of how computer works and process data and information.
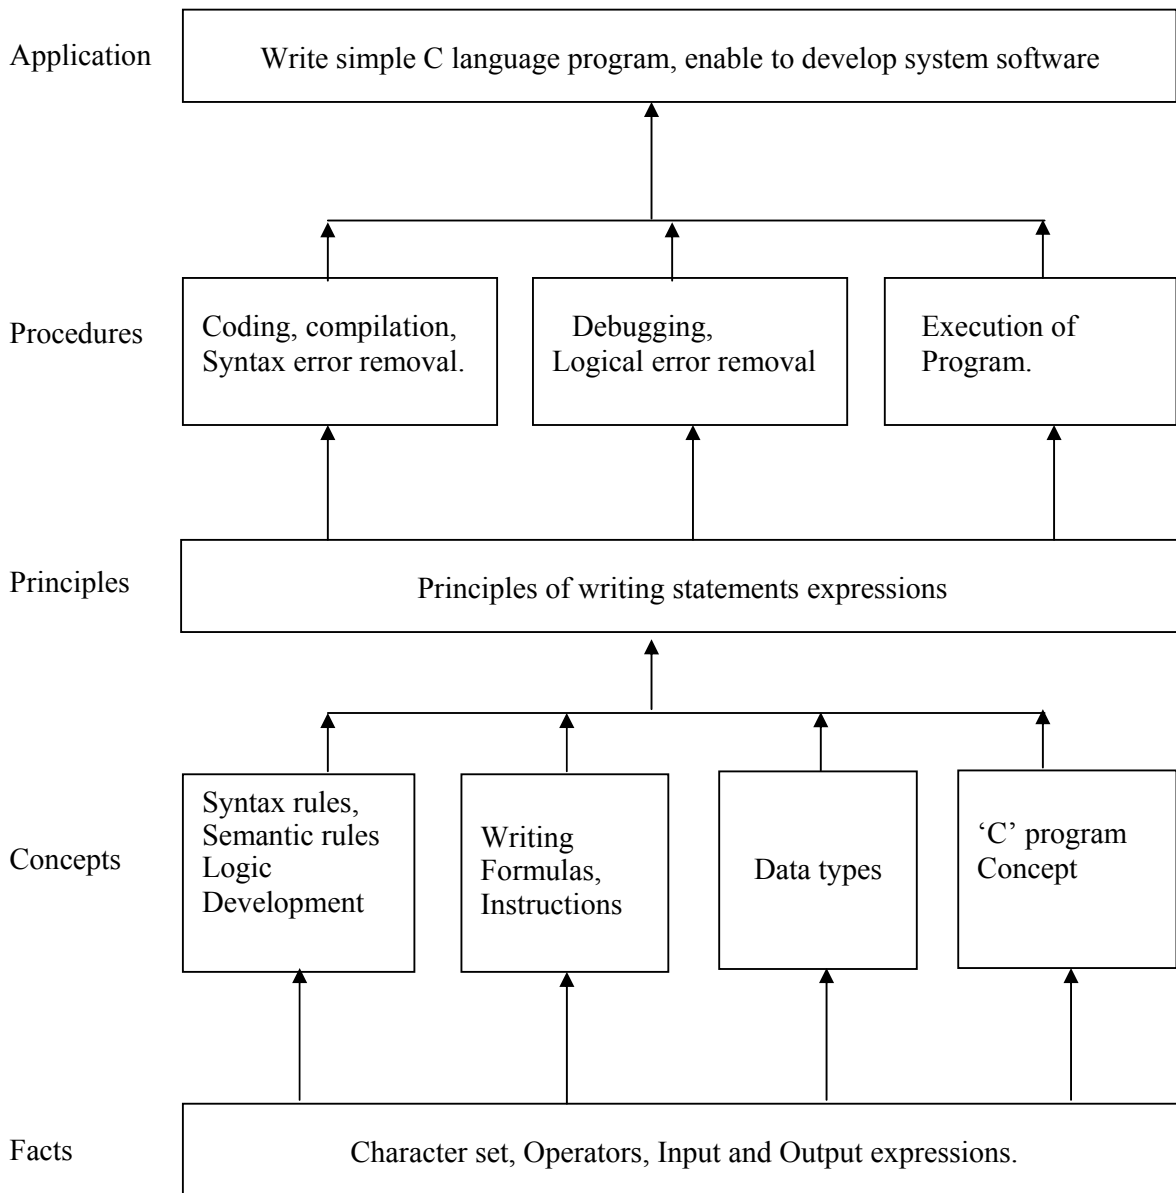

'C' is the most widely used computer language, which is being taught as a core subject. C is general-purpose structural language that is powerful, efficient and compact, which combines features of high-level language and low-level language. It is closer to Man and Machine both. Due to this inherent flexibility and tolerance it is suitable for different development environments. C is still considered as first priority programming language.

This subject covers from the basic concept of C to pointers in C. This subject will act as "programming concept developer" for students. It will also act as "Backbone" for subjects like OOPS, VB, Windows Programming, JAVA, OOMD, etc.

General Objectives: The students will be able to

- Understand the concepts of constants, variables, data types and operators.
- Write algorithm and draw flowchart for a given problem statement.
- Develop programs using input and output operations.

Learning Structure:

Application	Write simple C language program, enable to develop system software

Procedures	Coding, compilation, Syntax error removal.	Debugging, Logical error removal	Execution of Program.

Principles	Principles of writing statements expressions

Concepts	Syntax rules, Semantic rules Logic Development	Writing Formulas, Instructions	Data types	'C' program Concept

Facts	Character set, Operators, Input and Output expressions.

Topics and Contents	Hours	Marks

Topic 1: Basics of C
Specific Objectives: -
➢ State rules for declaration of variables, constants and operators
➢ Write simple program using formatted input and formatted output.
Contents:
    ➢ History of C, where C stands
    ➢ C character set, tokens, constants, variables, keywords , identifiers
    ➢ C operators- arithmetic, Logical, assignment, relational, increment and decrement, conditional, bit wise, special, operator precedence, C expressions data types
    ➢ Problem solving techniques : flowchart and algorithm
    ➢ Formatted input, formatted output instructions.
	08	**18**

Topic 2: Decision making **Specific Objectives: -** ➢ Write a simple program using decision making, branching statement, looping statement ➢ Describe use of break and continue statement. 2.1 Decision making and branching if-statement – if, if-else, else-if ladder, nested if else, switch case statement, break statement **(14M)** 2.2 Decision making and looping - while, do, do- while statement , for loop, continue statement **(14M)**	**10**	**28**

Topic 3: Arrays and Strings
Specific Objectives: -
    ➢ Give syntax of single dimensional, multidimensional array and strings.
    ➢ Write a program using array and string.
3.1 Arrays Declaration and initialization of one dimensional, two Dimensional and character arrays, accessing array elements. **(10M)**
3.2 Declaration and initialization of string variables, string handling functions from standard library – strlen(), strcpy(), strcat(), strcmp() **(08M)**
	10	**18**

Topic 4: Functions and Structures **Specific Objectives: -** ➢ State the scope of local and global variable. ➢ Understand the category of function call and function type and write program. ➢ Write and execute the program using command-line argument. ➢ Write a program using structure 4.1 Functions: - Need of functions, scope and lifetime of variables, defining functions, function call, call by value, call by reference, return values, storage classes. category of function - No argument No return value, No argument with return value, argument with return value, recursion, command line arguments **(16M)** 4.2 Structures: - Defining structure, declaring and accessing structure members, initialization of structure, arrays of structure. **(8M)**	**14**	**24**

Topic 5: Pointers **Specific Objectives: -** ➤ State the declaration syntax of pointer, pointer initialization ➤ Write the program using pointer arithmetic Understanding pointers, declaring pointer variable, initialization of pointer variable, accessing address of a variable, pointer expressions, Pointers arithmetic	**06**	**12**
Total	**48**	**100**

Practical:
   Skills to be developed**:**
Intellectual skills:

- Use of programming language concepts in program implementation.
- Apply appropriate logics to solve given problem.
- Write program using different implementations for the same problem
- Identify different types of errors as syntax semantic, fatal, linker & logical
- Debugging of programs

Motor skills:

- Proper handling of Computer System**.**

List of Practical: At least 4 sample programs on each title

Demo Lectures with power point presentations using LCD projector can be arranged to develop programming concepts of students.

Sr. No.	Title of Experiment	Hours	Programs
01	To draw flowchart and write algorithms for sample program	02	04
02	To write a C program for formatted input and output statements	04	02
03	To write a C program for various operators in 'C'	06	02
04	To write a C program for decision control with if else statements	06	03
05	To write a C program for decision control with switch case statement	06	03
06	To write a C program for Looping statements	08	04
07	To write a C program for single dimensional integer arrays	06	02
08	To write a C program for string functions,	08	02
09	To write a C program for recursive functions	04	02
10	To write a C program using structure	06	02
11	To write a C program for pointers to print values of variables and their addresses	04	02
12	To write a C program to demonstrate the concept of pointer arithmetic.	04	02
13	To write a C program for command line arguments in 'C'.	04	02

Learning Recourses:

Course Name : Computer Engineering Group

Course Code : CO/CD/CM/CW/IF

Semester   : Second

Subject Title : Basic Electronics

Subject Code : 17213

Teaching and Examination Scheme:

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
03	--	02	03	100	--	--	25@	125

NOTE:

➢ **Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.**

➢ **Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work. (SW)**
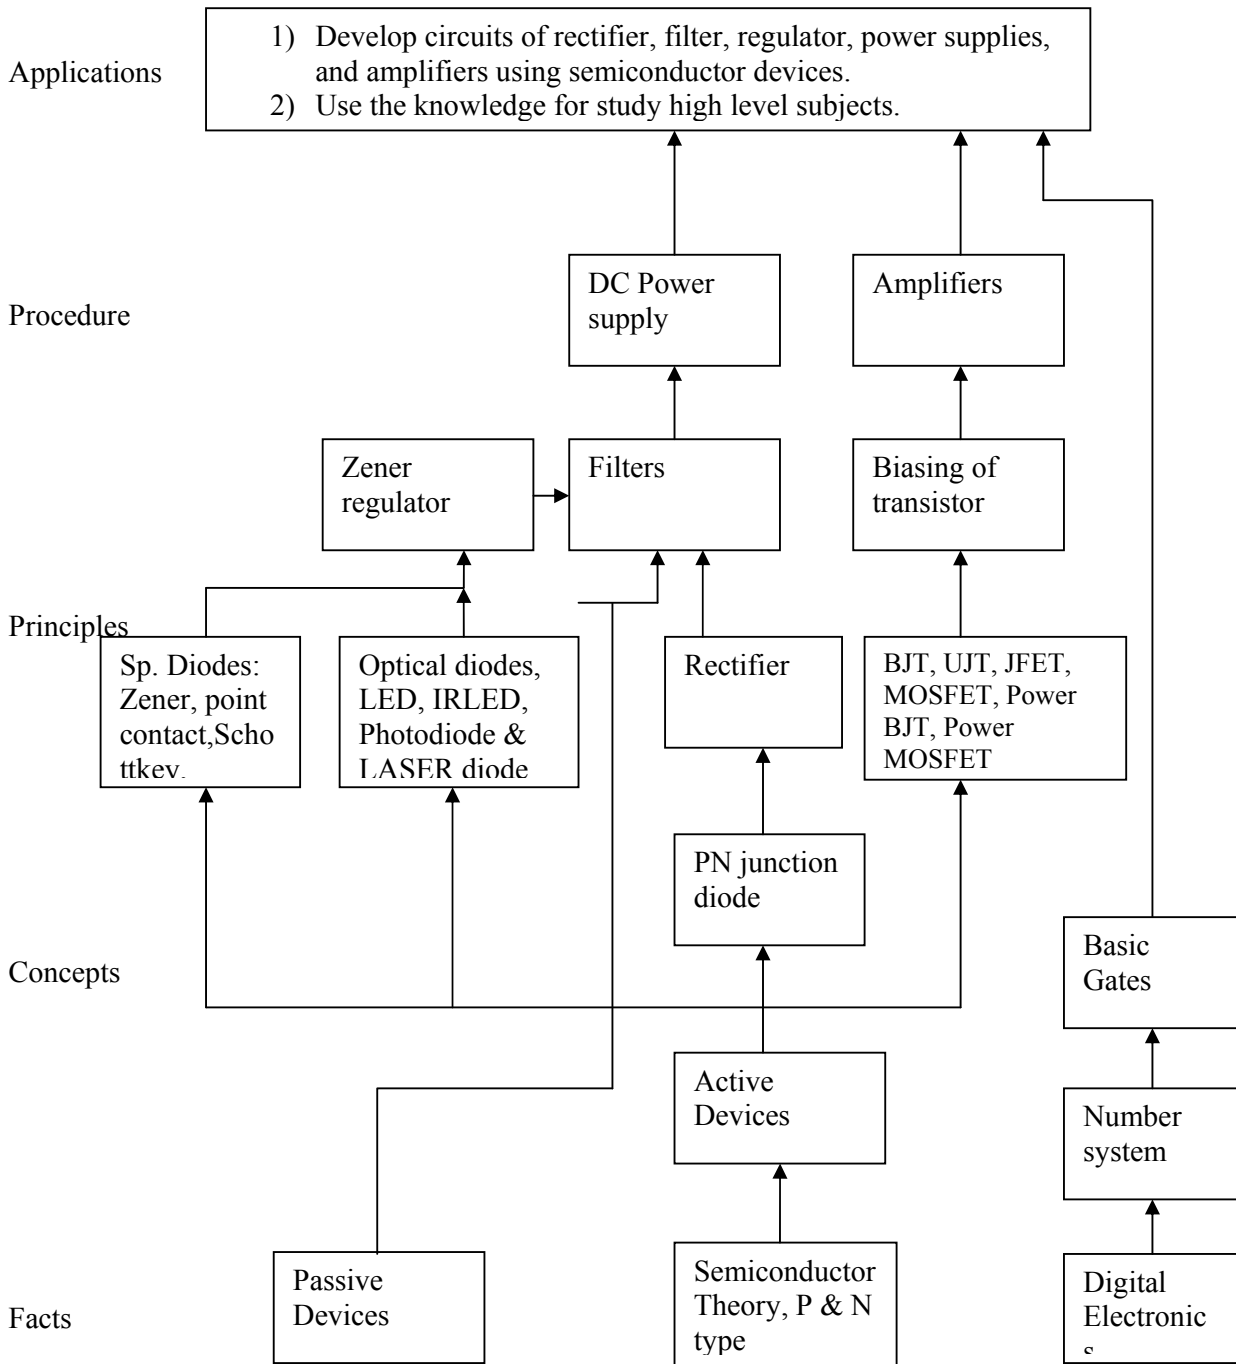

Rationale:

Electronics plays very important role in our day to day life. Basic electronics is the base for all engineering trades. It starts with the semiconductor material. Next the working principle of PN junction will help the students to understand the working of most of the semiconductor devices. Study of optical diodes gives basics for all optical devices such as scanner, Xerox machine, fax machine etc. Students should understand basics of power supply, since most of the electronic devices work on DC power supply. Study of MOSFET is essential since 95% of the semiconductor market is devices are controlled by MOSFETs. Introduction to digital electronics gives the students idea about working of microprocessor.

Objectives:

Students will be able to:

1. Define the scope of electronics.
2. State some applications of electronics in our day-to-day life.
3. State the latest trends in the field of electronics.
4. Draw the symbol, characteristics & applications of some important active devices.
5. Testing of active & passive components.
6. List the specifications of active & passive components.
7. Reading the data sheets of electronic components.

Learning Structure:

Applications

| 1) Develop circuits of rectifier, filter, regulator, power supplies, and amplifiers using semiconductor devices. |
| 2) Use the knowledge for study high level subjects. |

Procedure

| DC Power supply | | Amplifiers |

Principles

| Zener regulator | Filters | Biasing of transistor |

| Sp. Diodes: Zener, point contact,Schottkey. | Optical diodes, LED, IRLED, Photodiode & LASER diode | Rectifier | BJT, UJT, JFET, MOSFET, Power BJT, Power MOSFET |

Concepts

| PN junction diode | | Basic Gates |

| | | Number system |

Facts

| Passive Devices | Active Devices | Digital Electronics |

| | Semiconductor Theory, P & N type | |

Theory

Topic and Contents	Hours	Marks

Topic 1: Semiconductor Diode
 	
Specific Objectives:
  ➢ Select specific diode according to application.
  ➢ Select the diode with required specification.
 	
Contents:
1.1 Semiconductor Theory
• Review of semiconductor theory (No questions to be set in Theory Paper)
• Intrinsic semiconductor, Extrinsic semiconductor, doping, dopant
• Trivalent & pentavalent impurities, P- Type and N- Type semiconductor.
1.2 Semiconductor Diode
• PN Junction.
• Junction theory: Barrier voltage, Depletion region, Junction capacitance, Forward and reverse biased junction
• V- I characteristics of P-N junction diode.
• Circuit diagram for characteristics(Forward & Reverse)
1.3 Specifications of diode
• Forward Voltage Drop, Reverse Saturation Current, Maximum Forward Current, Power Dissipation.
• Ideal Diode Model.
1.4 Zener diode
• Construction & symbol
• Circuit diagram for characteristics(Forward & Reverse)
• Specification of zener diode: zener voltage(V_Z), Maximum power dissipation($P_{D(max)}$) , Break over current(I_{ZK}), zener resistance.
• Special purpose diodes: Schottkey diode, Point-contact diode, Varacter diode (Construction, symbol, Characteristics and applications).
• Optical diodes: LED, IRLED, Photodiode and LASER diode (Symbol, operating principle and applications of each)
	06	**12**

Topics 2: Rectifiers and Filters
 	
Specific Objectives:
  ➢ Select the specific rectifier & filter according to the requirement
  ➢ Lists various types of filter circuits with advantages & disadvantages.
Contents:
2.1 Rectifiers
  • Need of rectifier
  • Types of rectifier: Half wave rectifier, Full wave rectifier(Bridge and Centre tapped)
  • Working with waveform(IP /OP waveformsfor voltage and current, Average (DC) value of current and voltage (No derivation)
  • Ripple, ripple factor, ripple frequency, PIV of diode used, transformer utilization factor, efficiency of rectifier.
  • Comparison of three types of rectifiers (HWR. FWR (bridge & centre tapped).
2.2 Filters
  • Need of filters
  • Types of filters: shunt capacitor, series inductor, LC filter, π filter (circuit diagram, operation, DC O/P voltage, ripple factor (formula), ripple frequency, Dependence of ripple factor on load.
  • I/P and O/P waveforms, Limitations and Advantages of all types of filters.
	04	**08**

Topic : 3 Bipolar Junction Transistor
Specific Objectives:
  ➢ Identify the transistor configuration according to application.
  ➢ Lists types of biasing & coupling.
  ➢ Select the specific amplifier type according to application.
Contents:
3.1 Transistor   **16 Marks**
  • Transistor definition
  • Types: NPN, PNP junction transistors (Symbols, operating principle (NPN only)
  • Transistor configuration: Common emitter (CE), common collector (CC), common base (CB).
  • Characteristics in CE configuration (Circuit diagram, I/P and O/P characteristics, different points of characteristics (Cut-off, Active and Saturation), input resistance, output resistance, current gain (α and β) Transistor Biasing:
  • Need of biasing, DC load line, Operating point
  • Types of biasing circuits**:** Fixed bias circuit, Base biased with emitter feedback, Base biased with collector feedback, Voltage divider bias, Emitter biased
3. 2 Transistor as an amplifier (CE configuration only) 12 Marks
  • Graphical representation, Current gain, Voltage gain, Power gain (No derivation), Input output resistance, Phase shift between input and output.
  • AC Load line
  • Single Stage CE amplifier: Circuit diagram, Function of each
	18	**36**

component, Frequency response and bandwidth.
    Need of Cascaded amplifier
• Types of coupling : RC couple, Transformer couple, Direct couple (Circuit diagram and function of each component)
• Application of each amplifier
• Transistor as a switch – (Circuit diagram, operation, application)
 	
3.4 Power amplifier   **08 Marks**
• Introduction, classification : class A, class B, class AB, class C (Efficiency of each).
• Single stage class A power amplifier (Circuit operation, IP/OP waveforms, graphical analysis and efficiency)
• Transformer couple resistive load single stage power amplifier.
• Class A push pull amplifier.
• Class B push pull amplifier.
• Class AB push pull amplifier.
• Concept of cross over distortion.
• Need of heat sink.
  UJT
• Symbol, characteristics and working principle of UJT.		

Topic : 4 Field Effect Transistor (Unipolar Transistor) **Specific Objectives:** ➢ Differentiate between BJT & FET. ➢ Identify the type of unipolar transistor to suit the application. **Contents:** **4.1 FET** • Types, Symbols and working principle • Characteristics of FET, Circuit diagram for drain characteristics, Operating regions of characteristics. • Drain resistance, Mutual capacitance, amplification factor and their relation, Pinch off voltage of FET • Comparison of BJT and FET.(Types of carriers, switching speed, Thermal stability, space in case of IC fabrication, control parameter, input impedance, offset voltage, power gain at audio frequencies) **4.2 MOSFET** • Types, symbol, working principle • Application of FET and MOSFET.	**06**	**12**
Topic : 5 Regulated Power Supply **Specific Objectives:** ➢ Identify the regulator IC with specification. ➢ Select the regulator IC to meet the application. **Contents:** • Definition of regulator, Need of regulator, Voltage regulation factor, • Concept of load regulation and line regulation • Zener diode as a voltage regulator. • Basic block diagram of DC power supply • Transistorized Series voltage regulator, Transistorized Shunt	**04**	**12**

voltage regulator, (Circuit diagram and operation) **Regulator IC's** • IC's 78XX, 79XX (Functional Pin diagram) • IC 723 as fixed , variable and Dual regulator.		
Topic: 6 Oscillators **Specific Objectives:** ➢ State the concept of feedback & Barkhausen criteria. ➢ Select the specific oscillator circuit according to application. **Contents:** • Definition and block diagram of oscillator. • Concept of feedback, Types of feedback, Positive feedback, Negative feedback, Barkhausen's criterion **Classification of oscillators** • LC oscillators • Hartley oscillators • Colpitt's oscillators • RC oscillator • Crystal Oscillator **(circuit diagram & working)**	**06**	**12**
Topic : 7 Digital Electronics **Specific Objectives:** ➢ Identify various gates with truth table. ➢ Describe the basics of Micro Processor. **Contents:** • Digital circuit, Digital signal, Use of digital circuit and signal. • Number System : Introduction to binary, octal decimal and hexadecimal number system. **Logic Gates** • Logic symbol, Logical expression and truth table of AND, OR, NOT, EX-OR, & EX-NOR gates. • Universal gates : NAND gate and NOR gate • Application of Digital Electronics • Basic block diagram of Microprocessor.	**04**	**08**
Total	**48**	**100**

Practical:

Skills to be developed:

Intellectual Skills:
1. Identification & selection of components.
2. Interpretation of circuits.
3. Understand working of rectifier, filter, amplifier & oscillator circuits.

Motor Skills:
1. Ability to draw the circuits
2. Ability to measure various parameters.
3. Ability to test the components using multimeter.
4. Ability to read data sheets of components.

5. Follow standard test procedures.

List of Practicals:
1. Forward & Reverse characteristics of diode.
2. Forward & Reverse characteristics of zener diode.
3. Study of Rectifiers (Half wave & Full wave) & Filters(Capacitor & Inductor Filter)
4. Input & output characteristics of transistor in CE mode.
5. Characteristics of FET.
6. Characteristics of UJT.
7. Load & Line regulation characteristics of Zener Diode Regulator.
8. Frequency response of single stage RC coupled amplifier.
9. Determine waveforms of LC & RC oscillator circuits.
10. Verifying truth tables of logic gates using ICs.

Teaching and examination Scheme

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
03	01	--	03	100	--	--	--	100

NOTE:

- ➢ **Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.**
- ➢ **Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work. (SW)**

Rationale:

       This subject is an extension of Basic mathematics of first semester and a bridge to further study of applied mathematics. The knowledge of mathematics is useful in other technical areas.

       Differential calculus has applications in different engineering branches. For example concepts such as bending moment, curvature, maxima and minima.
       Numerical methods are used in programming as an essential part of computer engineering. For solution of problems in electrical circuits and machine performances complex number is used engineering mathematics lays the foundation to understand technical principles in various fields.

General objectives:

Student will be able to

1) Use complex numbers for representing different circuit component in complex form to determine performance of electrical circuit and machines.

2) Apply rules and methods of differential calculus to solve problems.

3) Apply various numerical methods to solve algebraic and simultaneous equations.

Learning Structure:

Application

> Apply the knowledge numerical method , derivatives and complex number in various technical areas

Procedure

| Performing algebraic operation, and apply De-Moivre's theorem for finding root of algebraic equation. | Find limit of functions, Find first and second order derivatives, Derivatives using rules of derivatives, Methods of differentiation. | Approximate root of algebraic equation using various methods. Unknown values in various simultaneous equations. |

Principle

| Algebra of complex number , De- Moivre's theorem | Theorems of limit and rules of derivatives | Methods of bisection, Regula falsi, Newton raphson, Gauss elimination, Jacobi's and Gauss Seidal. |

Concept

| Real and imaginary part of complex number, modulus, argument, polar, exponential form and conjugate of complex number | Interval, dependent and independent variables, increasing and decreasing function. | Iterative method |

Facts

| Complex number, imaginary root | Function, notation of derivatives, first order derivatives, second order derivatives, Partial derivatives, notation. | Algebraic equation and simultaneous equation |

Content Theory:

Topic	Hours	Marks
Topic 1 - Complex number		

1.1 Complex number   ------------------------   **14**
 Specific objectives :
   ➢ Find roots of algebraic equations which are not in real.
   • Definition of complex number, Cartesian, polar and exponential forms of complex number.
   • Algebra of complex number such as equality, addition, subtraction, multiplication and division.
   • De- Moivre's theorem with simple examples.
   • Euler's form of circular functions, hyperbolic functions and relation between circular and hyperbolic functions.
	08	**14**

Topic 2 - Differential Calculus		

2.1 Function   -------------------------   **14**
 Specific objectives :
   ➢ Identify the function and find the value of function.
   • Definition of function, range and domain of function.
   • Value of function at a point.
   • Types of functions and examples.
	08	**58**

2.2 Limits   ----------------------------   **20**
 Specific objectives :
   ➢ To evaluate limit of function.
   • Concept and definition of limit.
   • Limits of algebraic, trigonometric, logarithmic and exponential functions with examples.
	08	

2.3 Derivatives   ------------------------------   **24**
 Specific objectives :
   ➢ Find the derivatives by first principle.
   ➢ Solve problems using rules and methods of derivatives
   • Definition of derivatives, notation, derivatives of standard function using first principle.
   • Rules of differentiation such as, derivatives of sum or difference, product, and quotient with proofs.
   • Derivative of composite function with proof (Chain rule)
   • Derivatives of inverse trigonometric functions using substitution
   • Derivatives of inverse function.
   • Derivatives of implicit function.
   • Derivatives of parametric function.
   • Derivatives of one function w.r.t another function.
   • Logarithmic differentiation.
   • Second order differentiation.
	12	

Topic 3 - Numerical Method		

3.1 Solution of algebraic equation   --------------------------   **14**
 Specific objectives :
   ➢ Find the approximate root of algebraic equation.
   • Bisection method
   • Regula falsi method
   • Newton Rapshon method
	06	**28**

3.2 Numerical solution of simultaneous equations ------------------- **14**
Specific objectives :
   ➢ Solve the system of equations in three unknowns.
   • Gauss elimination method
   • Jacobi's method
   • Gauss Seidal method
	06	

Total	**48**	**100**

Tutorials:
1) Tutorial are to be used to get enough practice.
2) In each tutorial make a group of 20 student students and for each group minimum 10 problems are to be given.

List of Tutorials:

Sr No.	Topic for Tutorial
1	Complex number (Examples based on algebra of complex numbers)
2	Complex number (Examples based on De Moivre's theorem and Euler's formulae)
3	Function
4	Limit (algebraic and trigonometric functions)
5	Limit (logarithmic and exponential functions)
6	Derivatives by first principle
7	Derivatives (Examples based on formulae of standard functions and rules)
8	Derivatives (Examples based on methods of differentiation)
10	Solution of algebraic equations
11	Solution of simultaneous equations

Learning Resources:

Subject Title : Development of Life Skills

Subject Code : 17010

Teaching and Examination Scheme:

Teaching Scheme			Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
01	--	02	--	--	--	25@	--	25

Rationale:

Globalization has emphasized the need for overall development of technician to survive in modern era. Soft skills development in addition to technical knowledge; plays a key role in enhancing his/her employability.

This subject aims to provide insights into various facets of developing ones personality in terms of capabilities, strengths, weakness, etc as well as to improve reading, listening and presentation skills. Also in this age fierce competition, the time and stress management techniques will immensely help the technician to live happy and purposeful life.

General Objectives:

After studying this subject, the students will be able to:

1. Understand and appreciate importance of life skills.
2. Use self-analysis and apply techniques to develop personality.
3. Use different search techniques for gathering information and working effectively.
4. Improve the presentation skills.

Learning Structure:

Application	• Self-development and growth • Performing tasks effectively by implementing soft skills • Goal achievements and result oriented work	
Procedure	• Preparing slides / transparencies • Reading, writing, notes taking	• Doing exercise • Managing time
Principle	• Self analysis • Time management	• SWOT analysis • Stress management
Concept	• Presentation • Study • Time	• Personality • Attitude • Stress
Facts	• Work place as a system • Information	• Smart engineer • Task or Goal

Theory:

Topic and Contents	Hours

TOPIC 1: SELF ANALYISIS
Specific Objectives:
  ➢ To introduce oneself.
Contents:
  1.1 Need of Self Analysis
  1.2 Attitude and types (positive, negative, optimistic and pessimistic)
  Guidelines for developing positive attitude.
	02

TOPIC 2: STUDY TECHNIQUES
Specific Objectives:
  ➢ To identify different process and strategies.
  ➢ To improve reading, listening and notes taking skills.
Contents:
  2.1 Learning strategies
  2.2 Learning process
  2.3 Organization of knowledge
  2.4 Reading skills
  2.5 Listening skills
  2.6 Notes taking
  2.7 Enhancing memory
	03

TOPIC 3: INFORMATION SEARCH
Specific Objectives:
  ➢ To search information as per the need.
Contents:
  3.1 Sources of information
  3.2 Techniques of information search (library, internet, etc)
	02

TOPIC 4: SELF DEVELOPMENT
Specific Objectives:
  ➢ To set primary goals using SMART parameters.
  ➢ To Priorities the work effectively.
  ➢ To cope up with stress effectively.
Contents:
  4.1 Goal setting and its importance.
  4.2 Characteristics of Goal setting (**SMART- S**pecific, **M**easurable, **A**ttainable, **R**ealistic, **T**ime bound)
  4.3 Time Management - Importance, prioritization of work, time matrix, time savers, and time wasters.
  4.4 Stress Management - Definition, types of stress, causes of stress, managing stress, and stress busters.
	05

TOPIC 5: PRESENTATION TECHNIQUES
Specific Objectives:
  ➢ To plan for presentation.
  ➢ To prepare contents for presentation.
Contents:
	02

5.1 Importance of presentation. 5.2 Components of effective presentation (Body language, voice culture , rehearsal, etc) 5.3 Preparing for presentation. 5.4 Use of audio/video aids. (audio, video, transparency's, PowerPoint presentations, etc) 5.5 Performing presentation (Seminars, paper presentations, compering, etc)	

TOPIC 6: GROUP DISCUSSION
 Specific Objectives
   ➢ To understand the concept of group discussion
   ➢ To know the purpose of group discussion
 Contents
   6.1 Group discussion concept and purpose
   6.2 Method of conduction
	02

Total	**16**

Practical:
Skills to be developed:

Intellectual Skills:

Student will be able to

- Develop ability to find his capabilities.

- Select proper source of information.

- Follow the technique of time and stress management.

- Set the goal.

Motor Skills:

Student will be able to

- Follow the presentation of body language.

- Work on internet and search for information.

- Prepare slides / transparencies for presentation.

List of Practicals/activities:

1. Giving self introduction. Observe the demonstration of self introduction given by the teacher and prepare a write up on the following points and introduce yourself in front of your batch in 5 minutes

   ➢ Name

   ➢ Native place

   ➢ Background of school from where he / she passed

   ➢ Family background

> ➢ Hobbies / salient achievements / idols if any for self development
>
> ➢ Aims of life as an Engineer

2. Provide responses to the questions based on the moral story given in the assignment.

3. Judge your attitude by responding to the tests given in the assignment and write comments on your score.

4. Read any chapter from the subject of Engineering Physics / Engineering Chemistry and identify facts, concepts, principles, procedures, and application from that chapter

5. Participate in the panel discussion on techniques of effective learning and provide the responses to the questions.

6. Access the book on Biography of Scientists/Industrialist/Social leader/Sports Person from library. Read the book and note the name of author, publication, year of publication, and summarize the highlights of the book.

7. Prepare notes on given topic by referring to books / journals / websites.

8. Prepare 8 to 10 power point slides based on the notes prepared on the above topic. Present the contents for 10 minutes Group wise(Group will be of 4 students)

Note – Subject teacher shall guide the students in completing the assignments based on above practical.

Learning Resources:

Rationale:

    E-commerce is the buzz word in the business sector all over the world. World Wide Web is the basic technology for e-commerce and HTML is the medium for creating web pages. This subject aims at designing and developing web pages. It also serves as a prerequisite for Scripting Technology subject.

Objective:

Students will be able to

   a) Design and write code using HTML and CSS coding.

   b) Write code for validation at client side using JavaScript.
   c) Design and create static website.

Intellectual Skills:

   a) To create effective web pages using various HTML tags.

   b) Understand of CSS for effective formatting web pages.

   c) To Embed images and animation files.

   d) To Understand concepts of client side validation.

Motor Skills:

   a) Surfing different types of web sites.

   b) Students will be able to design and develop static web sites using HTML tags and CSS.

   c) Implement scripts

Learning Structure:

Application | Develop skill of developing and designing a complete Web site. |

↑

Procedure | Designing, formatting, linking, and creating Web pages including animation Web page and web site designing. |

↑

Concept | Markup language, HTML Tags, Scripting, GIF animation |

↑

Facts | Internet, Mark up Language, Animation |

Contents:

Name of the Topic	Hours
1. **INTRODUCTION TO WWW** **Objectives:** ➢ **To understand Browsers & Web Servers** ➢ **To understand structure of HTML document** • Information about Web Browsers, Web Servers and types of sites • Introduce Web page structure and basic structure tags: !DOCTYPE, HTML, HEAD, TITLE, BODY with attributes.	01
2. **BLOCK LEVEL TAGS AND HORIZONTAL RULES** **Objectives:** ➢ **To understand basic tags used in HTML Document** • Headings, Paragraphs, Breaks, Divisions, Centered Text, Block Quotes, Preformatted text, Address, HR tag.	01
3. **TEXT LEVEL TAGS AND SPECIAL CHARACTERS** **Objectives:** ➢ **To understand tags & special character used in HTML Document** • Bold, Italic, Teletype, Underline, Strikethrough, Superscript, Subscript DIV tag	01
4. **LISTS** **Objectives:** ➢ **To understand list types** • Ordered Lists, Unordered Lists, Definition Lists, Nested Lists.	01
5. **URL AND ANCHOR TAG** **Objectives:** ➢ **To understand types of linking** • URL : Types of URLs, Absolute URLs, Relative URLs • Anchor Tag: Linking various documents for internal and external links. Marquee Tag.	01
6. **IMAGES, COLORS AND BACKGROUNDS** **Objectives:** ➢ **To understand Image formats** • IMG tag and different Image formats, colors and backgrounds.	01
7. **TABLE** **Objectives:** ➢ **To understand different Table tags & attributes** • TABLE tag with attributes. TABLE, TR, TH, TD tags. border, cell spacing, cell padding, width, align, bgcolor attributes.	01
8. **FRAMES** **Objectives:** ➢ **To understand Frame attributes** • Types of Frames with their attributes Creating frames: FRAMESET tag – rows, cols attributes,	01

FRAME tag –name, frame border, margin height, margin width, src, resize, scrolling attributes. Use of NOFRAMES tag, Frame targeting.	

9. **FORMS**
Objectives:
  ➢ **To understand Forms attribute and methods.**
 	
  • Creating basic form: FORM tag, action and method attributes.
  • Form fields: Single line text field, password field, multiple line text area, radio buttons, and check boxes.
  • Pull down menus: SELECT and OPTION tags.
  • Buttons: submit, reset and generalized buttons.
	01

10. **STYLE SHEETS**
Objectives:
  ➢ **To understand different Style Sheets Rule and types.**
 	
  • Introduce Style Sheets with different types.
  • Adding style to the document: Linking to style sheets, Embedding style sheets, Using inline style.
  • Selectors: CLASS rules, ID rules.
  • Style sheet properties: font, text, box, color and background properties.
	02

11. **CLIENT SIDE SCRIPTING AND JAVA SCRIPT**
Objectives:
  ➢ **To understand about the client side Scripting.**
 	
  • Embedding JavaScript in HTML document. Embed tag, Variables, Constants, Adding comments.
  • Operators: Assignment, Arithmetic and Comparison operators.
  • Control structures and looping: if, if..else, for, for..in, while, do..while, break and continue.
  • Event handlers: onClick, onMouseOver, onMouseOut, onSubmit, onReset,
	02

12. **ANIMATION**
Objectives:
  ➢ **To understand about the gif animator**
 	
  • Creating a gif animation using gif animator.
  • Controlling gif animation through internal setting of gif animator.
  • Creating banner using gif animation.
	01

13. **PUTTING IT ALL TOGETHER: HOSTING THE WEBSITE** **Objectives:** ➢ **To understand how to publish the websites** Publishing the site, Outsourcing web hosting, Virtual Hosting	02
TOTAL	16

List of Practical:

Sr. No.	Title of Experiment	No. of Hours
1	Write a HTML code for creating Web page using structure tags for displaying "Welcome to HTML" message.	02
2	Create a web page for displaying a paragraph using Block level, HR tags, Text level tags and special characters.	02
3	Create a web page for implementing different types of Lists.	02
4	Create a web page to link web page in the same directory, different directory, in a subdirectory of a parent directory, any other directory, and link to Email ID.	02
5	Create a web page for changing colors of links using BODY tag attributes.	02
6	Create a web page using IMG tag implementing various attributes, implementing image as a button and setting image as background.	02
7	Create a web page implementing all formatting and table tags.	02
8	Create a web page for students Registration form using FORM tags.	02
9	Create a web page for demonstration of CSS applying Internal/External/ Inline style.	02
10	Write a java script for validation of phone No./ Acc. No.	02
11	Creating a gif animation using gif animator.	02

12	Creation of Web Site:
	Mini project containing minimum Ten web pages on any one Following list containing images ,colors & background, frames ,tables, forms, CSS .
	  1. Web site for Computer Department/ Information Technology Department.
	  2. Web site for any Vehicle Showroom.
	  3. Web site for Travel and Tourism Agency.
	  4. Web site for any Sport.(Ex. Cricket, Tennis etc.)
	  5. Any other suggested topic by subject teacher.
		08

Learning resources:
1. Books:

Sr. No	Author	Title of the Book	Publication
01	Thomas Powell	HTML and XHTML – The complete reference	Tata McGraw Hill, New Delhi.
02	Robbins	Learning Web Design	O'Reilly
03	Dick Oliver	SAMS Teach Yourself HTML & CSS in 24 Hours	Pearson Education Publication
04	Anne Bohem	HTML,XHTML and CSS	Murach's Publication

2. Web Sites:

1. http://www.w3schools.com/html
2. http://www.html.net/
3. http://www.2createawebsite.com
4. http://webdesign.about.com

Guidelines for Effective teaching:

- Focus should be given on latest technological WEB developments
- The subject teacher should have practical approach for teaching this subject.
- The teachers have to perform every practical before conducting it in laboratory.

List of Machines and Equipments:

Hardware Tools:

a) Computer systems
b) Printer
